

Latitude – Quantity Limits

The Latitude prescription drug plan includes quantity limits on certain medications. Quantity limits are based on recommendations from the manufacturers and the U.S. Food and Drug Administration (FDA) as well as generally accepted medical practices for dosing. These limits help ensure that you receive the proper dose and recommended duration of therapy for your condition, while minimizing potential for adverse events and inappropriate therapy. The following drug categories are subject to quantity limits:

- Anti-Migraine
- Sedative-Hypnotics
- Antiemetics
